

INDEX TO DISCOVER 1983

AGRICULTURE

genetic engineering for new crops, Dec. (page 88)
potatoes, bacterium prevents frost on leaves of, Nov. (14)

ANIMALS

See also Birds, Entomology.
elephant seals, polygyny and breeding habits, May (56)
experiments on, replaced by computer programs, Sept. (76)
fish: ear bones record growth of and water composition, Jan. (11); photographed in icy waters off Massachusetts (Gallery), Feb. (60); pollution-induced tumors in may presage rise in human cancer, Nov. (16)
lemurs (Gallery), Aug. (52)
murder, biologists study species that kill their own, Oct. (78)
pandas in Washington's National Zoo mate, May (13); offspring dies of pneumonia three hours after birth, Sept. (12)
spiders: warnings that keep unwary animals from blundering into webs, March (15); varieties of webs (Gallery), Jan. (48)
sponges, the splendor of (Gallery), Sept. (56)
whales: behavior studied by Payne, April (40); prehistoric whale fossil, June (12)

ANTHROPOLOGY

See also Archaeology, Evolution
Mead, Margaret: new book revives nature-versus-nurture debate, April (26); *Margaret Mead and Samoa*, by Derek Freeman (Book Bonus), April (33); her belief in psychic phenomena, Dec. (8)

ARCHAEOLOGY

ancient river beds under Sahara show up in Columbia satellite radar images, Feb. (6)
Indian cave drawings found in Tennessee, Feb. (7)
Lascaux caves replica, Sept. (83)
Philip II of Macedonia, reconstruction of his head, Nov. (14)
Vesuvius victims preserved at Herculaneum, Jan. (12)

ASTRONOMY

See also Cosmology, SETI, Space
black hole, second one found, March (14)
comets: dust collected by U-2 spy plane, Oct. (74); Halley's sighted by European astronomers, May (16); IRAS-Araki-Alcock discovered, July (70)
Infra-Red Astronomy Satellite: described, April (82); finds new comet, July (70); views possible Vega solar system, Oct. (12); view of Andromeda galaxy, July (10)
lunar volcanism may be less than a billion years old, May (16)
pulsar, fastest one yet found in constellation Vulpecula, Feb. (7)
solar eclipse, American astronomers gather in Java to study, Aug. (12)
sun, Japanese astronomers photograph rings around, Dec. (14)
telescopes: Palomar and others blinded by city lights, Oct. (10); San Diego city councilman defends choice of lights and reply by Carl Sagan, Dec. (13); space telescope delayed, June (14); telescope-makers contest in Vermont, Oct. (84)

AUTOMOBILES: see Inventions

AVIATION: see Inventions

AWARDS

Lasker awards to J. Michael Bishop, Harold Varmus, Hidesaburo Hanafusa, Raymond Erikson, Robert Gallo, Jan. (87)
Lasker Clinical Medical Research Award to Roscoe Brady, Elizabeth Neufeld, Jan. (87)
Nobels: attacked in New York Times editorial,

Feb. (8); awarded to Barbara McClintock in genetics, Subrahmanyam Chandrasekhar and William Fowler in physics, Henry Taube in chemistry, Dec. (32)

Westinghouse awards dominated by Bronx High School of Science students, May (20)

BEHAVIOR

See also Psychology
aggression, human, fallacy of linking with seasons, Dec. (34)
alcoholism and social drinking, support for Sobell study, Jan. (12)
animals that kill their own, Oct. (78)
anorexia and compulsive running, psychological similarity, April (14)
conversational style of Margaret Thatcher invites interruption, March (15)
language, origin of (Essay), March (80)
sleep deprivation experiment, Feb. (70)

BIOLOGY

See also Animals, Behavior, Disease, Genetics, Oceans, Plants, SETI, Trees
bacteria that live at high temperature and pressure (Essay), Oct. (42)
biological hypotheses do not always explain human flexibility (Essay), Dec. (34)
life on earth, theories on how it began, March (39)
nerve research on squid axon, Aug. (74)
oncogenes, role in causing cancer, Jan. (36)
Weinberg, Robert, biologist, profiled, Jan. (36)
why animals run on legs, not wheels, Sept. (64)

BIRDS

birdathon, California group ties one-day species-spotting record, July (60)
condors: first two born in captivity surviving well, June (12); second revealed to be female, Aug. (10); attempt flight at San Diego Zoo, Nov. (16)
feathers (Gallery), June (58)

BIRTH CONTROL: see Reproduction

THE BRAIN

boxing, effects on the brain, Jan. (20)
dyslexia, effects and cause of, techniques for coping with, Aug. (34)
memory: how it works, Nov. (18); how to improve it, Nov. (28)
Parkinson's disease may result from imbalance in brain chemical dopamine, Nov. (12)
PET scans: images of dopamine activity, Nov. (12)
schizophrenia: linked to structural abnormalities in, Aug. (10); may result from imbalance in brain chemical dopamine, Nov. (12)
unconscious brain may control seemingly voluntary acts, Nov. (14)

CANCER RESEARCH

angiogenesis, research may provide clues to stopping growth of cancerous tumors, Nov. (102)
carcinogens, many found in natural foods, Nov. (12)
leukemia-causing virus, Robert Gallo wins Lasker Award for discovering, Jan. (87)
monoclonal antibodies could be "magic bullets" against cancer, June (68)
multi-step cancer hypothesis bolstered by papers in *Nature*, Oct. (12)
oncogenes: possible role in cancer, Jan. (36); one linked to human gene with known function, Sept. (10)

CHEMISTRY

books preserved by diethyl zinc gas (DEZ), March (66)
chemical solutions in wood of Stradivari violins replicated by biochemist, Nov. (84)
cyanoacrylates used in fingerprinting kit, July (50)
dopamine, PET scan images show activity in the brain, Nov. (12)
drugs from the sea, April (60)

life: and chemistry of primitive earth, March (38); hot springs in ocean floor possible source of, March (42); meteors contain original stuff of, says Ponnampetuma, Nov. (50)
yellow rain: evidence of Soviet chemical and biological warfare, Feb. (100); doubts raised about Soviet use of (Essay), Aug. (80)

COMPUTERS

animal testing, computers used to replace, Sept. (76)
book and magazine production, new image processors for, April (68)
cartoons by Sidney Harris, April (72)
computer-enhanced photographs of Jupiter and Saturn raise new questions, May (34)
computer museum, Marlborough, Mass., Feb. (96)
Cray computer: used to find largest prime number, Feb. (92); creates spectacular art, Nov. (68)
data base proliferation, March (68)
facial reconstruction, aided by computer graphics and CT scans, May (86)
fertility computer gives go/no-go signal for sex, Feb. (53)
forgery detector spots alterations in documents, April (74)
Hell machine makes dazzling alterations in photographs, April (68)
IBM develops chip with 512K capacity, Nov. (84)
microprocessor plus eyepiece scans eyeball, provides quick identification, Aug. (64)
paralyzed girl walks with help of computer program, Jan. (10)
pt: Japanese supercomputer takes it to 4 million places, Feb. (93)
scientific theories may one day be conceived by computers, June (84)
security: hackers tap into Los Alamos National Laboratory, spotlight vulnerability of all computerized information, Oct. (15); how to lock out the hackers, Nov. (30)
superfast computers, development, Jan. (32)
video games: with stationary bike riding, Nov. (84); fifth grader syndicates news column about, Aug. (62); Ralph Nader, President Reagan comment on, May (96)
war gaming, JANUS system, Aug. (28)

COSMOLOGY

inflationary universe, young cosmologists propose that Big Bang started with big bubble, June (92)
supergravity, new theory unifies forces of nature, Dec. (44)

DIET

athletes' diets studied, Oct. (71)
natural foods, carcinogens and anti-carcinogens in, Nov. (12)

DISEASE

See also Cancer Research, Genetics, Medicine
acquired immune deficiency syndrome (AIDS): four journals agree to speed publication of reports, Oct. (16); importance of research (Essay), May (47); in monkeys, May (12); Ingelfinger rule and reporting on, April (12), rule defended by Arnold Relman, May (99); leukemia virus HTLV implicated, Nov. (16); medical reports should be published immediately, March (12); new research, new theories, July (74)
anorexia nervosa, psychological similarity to compulsive running, April (14)
cancer: oncogenes may be cause of, Jan. (36); fear reaching epidemic proportions (Essay), Nov. (78)
endocrine gland tumors, possible cause of Goliath's defeat, Dec. (16)
heart disease: atherosclerosis in monkeys caused by stress, July (10); effects of

INDEX TO DISCOVER 1983

alcohol on, April (15)
infectious diseases not likely to be eliminated soon (Essay), May (42)
measles vaccine administered by inhalation, Aug. (9)
Parkinson's disease: see *The Brain*
schizophrenia: see *The Brain*
sexually transmitted diseases: monoclonal antibodies provide quick test, April (15); possible role in ectopic pregnancies, June (80)
sickle-cell anemia, hemoglobin-producing gene switched on temporarily, Feb. (6)
thalassemia, hemoglobin-producing gene switched on temporarily, Feb. (6)
vaccination: genetic engineering creates hybrid viruses to fight herpes, hepatitis, and influenza, Dec. (14)

DRUGS

See also *Disease*, *Medicine*
anti-cancer drug 5-azacytidine switches on hemoglobin-producing gene, Feb. (6)
impotence linked to, June (12)
medicines from the sea, April (60)
starch blockers and weight reduction, Feb. (6)

EARTHQUAKES

tsunamis caused by, Aug. (18)

EDUCATION

Bronx High School of Science whiz kids, May (20)
science gifts for Christmas assessed, Dec. (78)
science teaching: decline in quality of, July (6); upgrading programs, May (26)
search for extraterrestrial intelligence, popular course at Cornell, March (48)
University of Texas recruits scientists, Jan. (24)
video games, President Reagan praises hand, eye, and brain coordination they teach, May (96)

ENERGY: see *Engineering*, *Invention*, *Technology*

ENGINEERING

See also *Computers*, *Education*, *Inventions*, *Technology*
bridge building model competition at Brookhaven Laboratory, July (54)
bridge collapse on I-95 in Connecticut examined, Sept. (14)
nuclear explosions used by Soviets in, Dec. (18)
nuclear reactor accidents, worst case assessments, Jan. (8)
tokamak fusion reactor passes first test, March (14)

ENTOMOLOGY

allomone, discovery of one that repels insects, June (14)
bug fossils, oldest known animal remains in North America, Aug. (10)
mosquitoes, new weapons against, July (66)
slavemaker ants squabble and compete to produce sons, Nov. (14)

ENVIRONMENT

See also *Meteorology*, *Nuclear Power*
acid rain: scientists know more about its origins, and Washington may act, Oct. (62); U.S. and Canada sign agreement to study movement of airborne pollutants, Oct. (16)
Amoco Cadiz oil spill, effects five years later, Sept. (11)
dioxin, contamination of Times Beach, Mo., and effects on human body examined, May (78); frightening letters from health officials, June (10)
fish with pollution-induced tumors, Nov. (16)
global habitability, NASA project on (Essay), June (65)
greenhouse effect, two reports warn of climate changes, Dec. (99)
Mississippi River tries to change course, March (23)

EVOLUTION

Darwinian evolution, test tube experiments with RNA, March (38)
Facing Up to Man's Past (Special Report), July (22)
first living thing, protein or nucleic acid?, March (38)
molecular clock (Special Report), July (28)
Preaching the molecular gospel (profile of Vincent Sarich), July (34)
Why animals run on legs, not wheels, Sept. (64)

FERTILITY: see *Medicine*, *Reproduction*

GENETICS

See also *Cancer Research*, *Disease*, *Evolution*
genetic engineering: multipurpose vaccine, Dec. (14); new plants, Dec. (88); Rifkin campaign against, Aug. (6), Nov. (14), Dec. (88); used to develop disease-resistant grapevines, March (86)
growth hormone gene from rats makes mice grow bigger, Feb. (7)
hemoglobin-producing gene switched on temporarily with anti-cancer drug 5-azacytidine, Feb. (6)
heritable genes, first graft from one mammal species to another, Feb. (7)
McClintock wins Nobel Prize for discovery of movable genetic elements in maize, Dec. (27)
Murchison meteorite contains building blocks of life, Nov. (57)
myelin basic protein gene pinpointed, Dec. (16)
plants: advances in engineering may create second green revolution, Dec. (88); attempts to hamstring research on, Dec. (8)
prion, causes disease, seems to lack genes, April (76)
Weinberg, Robert, search for cancer-causing genes, Jan. (36)

GEOLOGY & GEOPHYSICS

See also *Earthquakes*, *Volcanoes*
agates, kaleidoscopic patterns of (Gallery), April (52)
barrier beaches, problems of, Sept. (68)
cave structures (Gallery), July (44)
coal fire under Centralia, Oct. (18)
minerals 4.2 billion years old found in Australia, possible remnants of earth's original crust, July (8)
Mississippi River tries to change course, March (23)
satellite radar mapping: ocean floor, Jan. (10); ancient Sahara river valleys, Feb. (6)
tekites, mystery solved? June (74)
terraces: shake up thinking about plate tectonics, April (86); one found in eastern U.S., Oct. (14)

IMMUNOLOGY

bone marrow transplants for immune system diseases, April (14)
monoclonal antibodies save life of week-old baby born with faulty immune system, June (70)
virtuoso vaccine works against herpes, hepatitis, and influenza, Dec. (14)

INSECTS: see *Entomology*

INTELLIGENCE

dyslexia unrelated to, Aug. (39)
IQ scores, Japanese not so far ahead of Americans, May (13)

INVENTIONS

See also *Technology*
cars: hybrid electric and gas vehicle developed by General Electric, Sept. (34)
chemical solutions in wood of Stradivari violins replicated by biochemist, Nov. (84)
computer for birth control, Feb. (53)
diamond-to-metal bond developed at Los Alamos, March (82)
electric generator runs on sunlight-

absorbing soot, March (82)
electron microscope "sees" down to half an angstrom, April (74)
electronic road tolls in Hong Kong, July (50)
EyeDentifyer uses microprocessor and eyepiece to make positive identifications, Aug. (64)
fingerprint kit, used to detect prints on fabric and skin, July (50)
foam immobilizes spies, bank robbers, March (82)
forgery detector spots alterations in typewritten documents, April (74)
laser that emits ultraviolet light used in surgery, Aug. (64)
machine parts made by sculpturing with lasers, Feb. (53)
microwave instrument de-ices airplanes, Aug. (64)
microwave scalpel an aid in surgery, Sept. (34)
robot for disabling bombs, Sept. (34)
satellite communicator for disaster victims, April (74)
video game spices up stationary bike riding, Nov. (84)
wind tunnel, vertical, allows human birds to float on air, Feb. (53)

LASERS: see *Inventions*, *Medicine*, *Technology*

LINGUISTICS

children may be responsible for originating language (Essay), March (80)

MATHEMATICS

Mersenne numbers, used in finding primes, Feb. (92)
Mordell's conjecture finally proved correct, Sept. (10)
pi, Japanese take it to four million places, Feb. (92)
prime number, computer scientist bags largest yet, Feb. (92)

MEDICAL TECHNOLOGY

See also *Inventions*
artificial heart, special report, Feb. (13)
computer graphics, use in reconstructive surgery, May (86)
computerized program helps paralyzed girl to walk, Jan. (10)
implantable hearing aids, Oct. (54)
pacemaker (Essay), Jan. (58)
reconstruction of Philip II's head, Nov. (14)
shock therapy makes a comeback, Jan. (54)
ultrasound treatment for kidney stones, Jan. (11)

MEDICINE

See also *Cancer Research*, *Diet*, *Disease*, *Drugs*, *Genetics*, *Immunology*, *Medical Technology*, *Reproduction*
acupuncture, Chinese doctors use to minimize damage during heart attack, June (14)
alcoholism and social drinking, Jan. (12)
day leaves endanger digestive tract, Sept. (12)
boxing: fighter's death raises questions about effects on brain, Jan. (20); doctors urge reform, March (14)
dopamine activity in brain seen with PET scans, Nov. (12)
ectopic pregnancies increasing, June (80)
fraud: NIH seeks repayment of grant for Darsee heart research from Harvard, April (16); Emory University disclosure of fraudulent Darsee research, July (10)
heart, artificial: Barney Clark receives first one (Special Report), Feb. (14); Clark's recovery too slow to justify procedure in other patients, March (18); doctors encouraged despite Clark's death, May (16); University of Utah restricts films of operation, Nov. (66)
heart attacks, four factors found that make repeat attack more likely, Oct. (15)
heart cell damage, new test measures it two hours after heart attack, March (18)
Ingelfinger rule: AIDS reporting slowed, April (12); defended by Reiman, May (99); decision to

rescind for AIDS research, Oct. (16)
laser, ultraviolet, used in surgery, Aug. (64)
monoclonal antibodies, use against cancer and other diseases, June (68)
prion, "slow virus" lacking genetic material, thought to be found, April (76)
shock therapy makes a comeback, Jan. (54)
smokers take in as much nicotine from low-yield cigarettes as from other kinds, Sept. (11)
squid provides clues to human nervous system disorders, Aug. (74)
steroids, dangerous and may not help athletic performance, Nov. (98)
stress, cause of atherosclerosis in monkeys, July (10)
vaccination for measles by inhalation, Aug. (9)
yellow rain: evidence of Soviet biological warfare, Feb. (100); doubts about (Essay), Aug. (80)

METEOROLOGY

carbon dioxide in atmosphere, reports on warming trend, Dec. (99)
El Niño: effects on Latin America, Australia, May (12); causes plague of weird weather, June (18); effects on animal and plant life, Oct. (28)
seasons and link with crime frequency examined (Essay), Dec. (34)
tornado researcher Ted Fujita, profiled, May (48)

NEUROLOGY

See also The Brain
squid axon used in nerve research, Aug. (74)

NUCLEAR ARMS & ENERGY

peaceful nuclear explosions used by Soviets, Dec. (18)
Reagan calls for new anti-missile technology, May (12)
Union of Concerned Scientists exploits fears, distorts facts of nuclear power, Nov. (8)

THE OCEANS

contours of ocean surface mapped from Seasat satellite data, Jan. (10)
El Niño effects, May 12, June (18), Oct. (28)
hydrothermal vents: perhaps sources of earliest life on earth, March (42); On Life in a Hell of a Place (Essay), Oct. (42)
oil spill in 1978 from *Amoco Cadiz* cleaned up by naturally occurring bacteria, Sept. (11)
tsunamis, causes and warning system, Aug. (18)

PALEONTOLOGY

See also Evolution
bug fossils, oldest known animal remains in North America, Aug. (10)
Eocene fossils excavated at West German site (Gallery), Dec. (66)
whale fossil, missing link between land and sea mammals, June (12)

PARAPSYCHOLOGY

McDonnell Laboratory study exposed by Randi's "psychic Abscam," March (10)
Mead, Margaret, belief in, Dec. (8)

PEOPLE

Abbott, Allan, pedals human-powered float, March (90)
Adler, Alfred, supervised psychoanalysis of Ian Fleming in 1927, Aug. (63)
Allen, Bryan, pedals human-powered float, March (90)
Asimov, Isaac, attends Arthur C. Clarke publishing party, Jan. (87); attends Planetary Society banquet, Feb. (94)
Barnard, Christiaan, announces retirement, March (90)
Bierer, Joshua, helped Alfred Adler counsel Ian Fleming, Aug. (63)
Bishop, Michael, Lasker Award winner, Jan. (87)
Bollag, Brigitte, discovers uncredited research by Robert Wiesmann, Nov. (66)

Brady, Roscoe, awarded Lasker, Jan. (87)
Brenner, Sydney, celebrates 30th anniversary of discovery of DNA, June (47)
Bronstein-Bonte, Irena, addresses conference on women in science, June (47)
Carson, Johnny, Planetary Society member, backs SETI, May (96)
Clark, Barney, family restricts distribution of transplant film, Nov. (66)
Clarke, Arthur C., publishes new novel, Jan. (87)
Cousteau, Jacques Yves, accepts Lindbergh award, Aug. (62)
Crick, Francis, celebrates 30th anniversary of discovery of DNA, June (47)
DeBakey, Michael, chairs Lasker Awards, Jan. (87)
Einstein, Albert, surveillance by FBI, Nov. (66)
Erikson, Raymond, awarded Lasker, Jan. (87)
Field, George, dangles spoons, Feb. (94)
Fleming, Ian, analysis by Alfred Adler, Aug. (63)
Gallo, Robert, awarded Lasker, Jan. (87)
Gimbel, Peter, attends Arthur C. Clarke publishing party, Jan. (87)
Gombosi, Tamas, attends Planetary Society banquet, Feb. (94)
Hanafusa, Hidesaburo, awarded Lasker, Dec. (87)
Hoover, J. Edgar, kept Einstein under surveillance, Nov. (66)
Horowitz, Paul, commences search for extraterrestrial intelligence, May (96)
Jensen, James, "Dinosaur Jim," retires from Brigham Young University, March (90)
Kistiakowsky, Vera, on women in science, June (47)
Lasker, Mary, at awards ceremony, Jan. (87)
Lawrence, Mary, asks to have late husband Ernest's name dropped from Lawrence Livermore National Laboratory, Oct. (61)
MacCreedy, Paul, designs human-pedaled parade float, March (90)
Michener, James, backs SETI, May (96)
Miller, Jonathan, returns to medicine, June (47)
Möller, Paul Hermann, assisted in Nobel-winning DDT research, Nov. (66)
Murray, Bruce, attends Planetary Society banquet, Feb. (94)
Nader, Ralph, blasts video games, May (96)
Neufeld, Elizabeth, awarded Lasker, Jan. (87)
Pauling, Linus, settles breach of contract lawsuit out of court, Oct. (61)
Pert, Candace, addresses conference on women in science, June (47)
Press, Frank, attends Planetary Society banquet, Feb. (94)
Randi, James, attends Arthur C. Clarke publishing party, Jan. (87)
Reagan, Ronald, finds merit in video games, May (96)
Robinson, Arthur, out of court settlement with Linus Pauling, Oct. (61)
Sagan, Carl, addresses Planetary Society banquet, Feb. (94); backs SETI project, May (96)
Savitskaya, Svetlana, on women as cosmonauts, May (96)
Schwartz, Richard Alan, discovers FBI files on Einstein, Nov. (66)
Skarin, Ron, pedals human-powered float, March (90)
Stovall, Rawson, age 11, writes video games column, Aug. (62)
Swank, Jean, addresses conference on women in science, June (47)
Szent-Györgyi, Albert, celebrates 90th birthday, Oct. (61)
Tereszkova, Valentina, her space sickness noted, May (96)
Varmus, Harold, Lasker Award winner, Jan. (87)
Watson, James, celebrates 30th anniversary of discovery of DNA, June (47)
Wiesmann, Robert, belatedly credited for DDT research, Nov. (66)
Williamson, Robert, comments on anniversary of

DNA discovery, June (47)
Winchell, Walter, forwarded data on Einstein to FBI, Nov. (66)

PERSONALITIES

Ayala, José Francisco, geneticist, Oct. (36)
Benford, Gregory, physicist and science fiction writer, Aug. (66)
DeVries, William, heart surgeon, Feb. (22)
Drake, Frank, Cornell astronomer, March (44)
Fujita, Ted, meteorologist, May (48)
McClintock, Barbara, geneticist, Dec. (26)
Payne, Roger, biologist, April (40)
Ponnamperuma, Cyril, chemist, Nov. (50)
Sarich, Vincent, biochemist, July (34)
Skinner, B.F., behavioral psychologist, Sept. (38)
Weinberg, Robert, biologist, Scientist of the Year, Jan. (36)
Weisskopf, Victor, physicist, June (48)

PHYSICS

See also Cosmology
art and science, kinship discussed (Essay), Dec. (54)
complementarity, accommodates contradictions in science (Essay), Nov. (62)
culture, place of physics and science in, May (92)
Einstein: FBI accusations, Nov. (66); supergravity may be answer to his dream of a unified theory, Dec. (44)
forces of nature, discovery of W and Z particles confuses understanding of (Essay), Aug. (32)
grand unified theory: importance of W and Z particles, Jan. (10); discovery of W particles at CERN, March (15); discovery of Z particles confirms Weinberg, Salam, Glashow theory, April (18); Z particle found at CERN, July (8); supergravity as, Dec. (44)
intermediate vector bosons: see grand unified theory
measurement and uncertainty (Essay), Oct. (68)
nature, shapes sculptured by unseen forces behind them (Essay), July (52)
neutrinos, possible use in prospecting for gas and oil, April (16)
perception, how we "see" the world we cannot see (Essay), April (66)
resonance (Essay), Feb. (54)
right and wrong in science (Essay), Sept. (48)
shape of things (Essay), July (52)
superconducting super collider, design proceeds on largest accelerator ever built, Dec. (52)
supergravity theory unifies the forces of nature, fulfilling Einstein's dream, Dec. (44)
synchrotron radiation reveals molecules with unprecedented clarity, Feb. (76)
Tevatron accelerator, successful test, Sept. (10)
tokamak fusion reactor, first test, March (14)
Weisskopf, Victor, physicist, profiled, June (48)

PLANTS

See also Trees
allomone, British scientists discover one that repels insects, June (14)
grapevines, genetic engineering for, March (86)
morels, secret process developed to grow commercially, April (16)
new crops from genetic engineering, Dec. (88)

POLLUTION: see Environment, Water

PSYCHOLOGY AND PSYCHIATRY

See also Behavior, Disease, Parapsychology
Bierer, Joshua, anecdotes about Alfred Adler and Ian Fleming, Aug. (63)
pets, therapeutic effects on owners, Aug. (86)
psychiatry, common misconceptions about, examined in *The Shrinking of America*, by Bernie Zilbergeld (Book Bonus), May (63)
shock therapy makes a comeback, Jan. (54)
Skinner, B.F., profiled, Sept. (38)
Soviets quit World Psychiatric Association, April (15)

REPRODUCTION

computer gives go/no-go signal for sex, Feb. (53)
embryo transfer a solution to human infertility, Sept. (11)
medicines linked to sexual impotence, June (12)
pregnancies that can kill, June (80)
The Pill, John Rock and the Church (Book Bonus), Feb. (82)

REVIEWS

The Atlas of Mankind (Rand McNally), April (93)
The Audubon Society Book of Insects (Les Line and Lorus and Margery Milne), Dec. (107)
Aztec Art (Esther Pasztory), Dec. (108)
The Backyard Bestiary (Ton de Jode and Anthonie Stolk), Feb. (107)
Betrayers of the Truth (William Broad and Nicholas Wade), April (92)
Chimpanzee Politics (Frans de Waal), March (95)
The Computer Programme (PBS TV series), May (103)
The Creative Explosion (John E. Pfeiffer), May (105)
Darwin on the Galapagos (documentary film), May (103)
The Day After (TV movie), Dec. (108)
Dead Tech (Sierra Club), Dec. (108)
Dinosaurs (Edwin H. Colbert), Nov. (107)
The Discovery of Animal Behavior (part of *Nature*, TV series), Jan. (86)
The Disease Detectives (Gerald Astor), Oct. (91)
Distant Encounters (Mark Washburn), Aug. (91)
Dragons and Unicorns (Paul and Karin Johnsgard), deadpan natural history, Jan. (85)
Exploring Our Living Planet (Robert D. Ballard), Dec. (105)
A Feeling for the Organism, biography of Barbara McClintock (Evelyn Fox Keller), July (81)
Field Guide to the Birds of North America, Dec. (108)
The Fifth Generation (Edward A. Feigenbaum and Pamela McCorduck), July (80)
A Flowering of Science (exhibition), July (78)
Freud and Man's Soul (Bruno Bettelheim), Feb. (105)
The Great East River Bridge 1883-1983 (exhibition), June (106)
The Great Geographical Atlas (Rand McNally), April (93)
The Heritage of Islam (exhibition), Aug. (90)
The Human Body (Jonathan Miller), Sept. (96)
The Inventions of Daedalus (David H. Jones), April (92)
Kepler (John Banville), Sept. (94)
Leonardo da Vinci as a Musician (Emanuel Winternitz), Jan. (84)
LIFE in Space (Time-Life Books), Dec. (108)
The Making of a Continent (Rod Redfern), Dec. (104)
The Maya Book of the Year (Francis Robiesek and Donald M. Hales), May (106)
The Miracle of Life (Nova TV show), March (92)
The Montgolfier Brothers and the Invention of Aviation (Charles Coulston Gillispie), Sept. (92)
Monuments of the Incas (John Hemming and Edward Ranney), Feb. (107)
Mountains of the Middle Kingdom (Galen Rowell), Dec. (105)
The Myths of Human Evolution (Niles Eldredge and Ian Tattersall), Jan. (82)
The Natural History of Alcoholism (George E. Vaillant), June (109)
Nature (PBS TV series), Nov. (110)
The New International Atlas (Rand McNally), April (93)
Nomads of Niger (Marion van Offelen), Dec. (106)
Nova (PBS TV series), Nov. (109)
People and Places of the Past (National Geographic), Dec. (105)
Powers of Ten (Philip and Phyllis Morrison), Nov. (106)
Ruth Benedict (Judith Modell), Aug. (92)

The Science in Science Fiction (Peter Nicholls, David Langford, and Brian Stableford), March (97)
Scabirds (Peter Harrison), Sept. (92)
The Sierra Club Handbook of Whales and Dolphins (Stephen Leatherwood and Randall R. Reeves), Dec. (106)
The Social Transformation of American Medicine (Paul Starr), March (94)
Star Gods of the Ancient Americas (exhibition), Feb. (108)
Stolen Treasure, Missing Links (pre-Columbian Peruvian artifacts, exhibition), Oct. (88)
Threshold (movie about artificial heart), March (92)
Treasures of the Sea (James Cribb), Dec. (106)
Treasures of the Smithsonian (Smithsonian Books), Dec. (108)
2010: Odyssey Two (Arthur C. Clarke), Jan. (82)
Ultralight Flight (Michael A. Markowski), Feb. (106)
Volcano Weather (Henry Stommel and Elizabeth Stommel), Aug. (91)
WarGames (movie), July (79)
The Way of the Animal Powers (Joseph Campbell), Dec. (104)
Weird & Wonderful Wildlife (Michael Marten, John May, and Rosemary Taylor), Dec. (106)
The Whys of a Philosophical Scrivener (Martin Gardner), Oct. (88)
The Wonder of Birds (National Geographic), Dec. (107)
A World of Animals (Bill Bruns), Dec. (107)

SETI (Search for Extraterrestrial Intelligence)

Hibbs, Albert, defense of, Aug. (44)
Life in Space, Special Report, March: Drake, Frank, father of SETI, profiled (44); Harvard/NASA projects (30); humans the only intelligent life (56); life on earth, how it began (39); Sagan on SETI and its importance (30); Tipler, Frank, criticism of SETI (56)

SKEPTICAL EYE

Agency, Jeremy Rifkin's book on genetic engineering, Aug. (6)
Centers for Disease Control sends alarming letters to residents of dioxin-tainted Missouri, June (10)
Hale telescope at Palomar threatened by San Diego outdoor lighting (column by Carl Sagan, Oct. (10))
Ingelfinger rule at *New England Journal of Medicine*, unfortunate consequences of, April (12)
magician foils parapsychologists, March (10)
Mead, Margaret, belief in psychic phenomena, Dec. (8)
Nobel prizes, N.Y. Times attacks, Feb. (8)
Rifkin, Jeremy: book on genetic engineering, Aug. (6); hamstrings plant engineering research, Dec. (8)
scientific research, its future in America not rosy (reprint of column in *Physics Today* by Sheldon Glashow), July (6)
tabloids' coverage of medical and science news borders on irresponsible, Sept. (8)
UFO abductions discussed, May (8)
Union of Concerned Scientists public relations ploy, Nov. (8)

SLEEP

deprivation, writer stays awake for 72 hours, Feb. (70)

SPACE

See also SETI
backpack for work in space, Sept. (24)
communications satellites: launched on *Columbia's* fifth flight, Jan. (14); Tracking and Data Relay Satellite launched from *Challenger*, June (100), nudged onto station, Sept. (12)
Galileo mission, plans for, May (31)
Mars Viking 1 lander stops responding, July (8)

meteorites found in Antarctica thought to be from moon and Mars, May (13)
NASA: fights budget crunch, sets new agenda, May (80); should be given money to conduct global habitability studies, says Lewis Thomas, June (65)
Pioneer 10 leaves solar system, Aug. (10)
Solar Max satellite, astronauts test backpack to be used in repair of, Sept. (25)
Soviet space program suffers setback with *Salut 7* glitches, Dec. (15)
Soviet woman cosmonaut breaks more than 20 world records for speed, altitude, and parachute jumping, May (96)
von Neumann probes, March (56)
Voyager photographs, enhanced by computer, raise new questions about Jupiter, Saturn, and their moons (Gallery), May (34)
weapons in, June (28)
women may make better astronauts, says Soviet woman cosmonaut, May (96)

SPACE SHUTTLE

Challenger: maiden voyage a success after problem with launch of Tracking and Data Relay Satellite (TDRS) overcome, June (100); night flight produces daylight view of Southern Hemisphere, Nov. (42); practices satellite release and retrieval, Aug. (8)
Columbia: launches two commercial satellites, Jan. (14); October lift-off postponed after defective rocket-nozzle lining found on *Challenger*, Dec. (14); radar images from show ancient rivers under Sahara, Feb. (6)

SPECIAL REPORTS

Facing Up to Man's Past, July (22)
Life in Space, March (29)
Replacing the Heart, Feb. (13)
Year in Science, Jan. (62)

SPORTS

boxing: effects on the brain, Jan. (20); doctors recommend reforms, March (15)
diets of athletes, nutritionists' views, Oct. (71)
running, compulsive, similarity to anorexia, April (14)
steroids, dangerous and may not improve performance, Nov. (99)

TECHNOLOGY

See also Engineering, Invention, Medical Technology
accelerator, particle, proposal for superconducting super collider, Dec. (52)
backpack for work in space, Sept. (24)
book preservation by vacuum chamber treatment, March (66)
cave reproduction at Lascaux, Sept. (84)
controlled burn-out for mine fires, Oct. (18)
Israeli Sabbath proscriptions observed in Israel with help of new technology, Nov. (86)
laser and particle beams, stopping missiles with, June (28)
screening helmets relieve hay fever sufferers, July (50)
synchrotron radiation for the study of molecules, Feb. (76)
wine making, new technology, March (87)

TREES

chemical defenses against insects, Sept. (28)
communication: willow trees emit warning when attacked, Aug. (9), Sept. (28)
wood-cell close-ups (Gallery), Oct. (48)

VOLCANOES

See also Meteorology
Kilauea's fiery fury (Gallery), March (72)
Mount Etna eruption, lava flow rerouted, July (18)
tsunamis caused by, Aug. (18)

WATER: see Environment
